

Specific Absorption Rate and/ Or Maximum Possible Emissions Statement

This is a part 15C device which complies with RF Exposure requirements because the power is less than 25mW. The limit of 25mW was calculated as follows:

$$60/F(\text{GHz}) = \text{mW}$$

$$60/2.4 = 25\text{mW}$$

Because this device is less than 25mW we have not measured SAR or MPE.
